Recycling
Sorting is a natural part of Svenheim's production and material handling. Plates from Svenheim can be recycled as heat at approved heating systems. Plastic and metal are delivered to approved environmental stations. Svenheim is a member of the return schemes Green Dot Norway for packaging and Eurovironment (Electrical return) for electrical components.

Cleaning and maintenance

General
Svenheim uses materials and surfaces that are resistant. No special maintenance beyond normal is required cleaning. Recommended cleaning method is cloth soaked in slightly warm water with a mild synthetic detergent. Avoid green soap or substances containing ammonia. Do not use solvents or cleaning detergents with abrasive/scouring powder.

Powder coated steel components
Used for table base. Clean as under «general» suggestions. Difficult stains are removed with chemical gasoline. Do not use solvents or cleaners with abrasive/scouring powder. Installation instructions for base are enclosed.

Quality assurance (Warranty)
Svenheim places high demands on quality both in terms of raw materials and processes in connection with product development, order processing, production, logistics and distribution. Our products are certified according to quality management standards ISO 9001 and 14001. Investing in quality furnishings from Svenheim means that you buy products that are easy to complete and repair, with market-adapted guarantees. Our office in Norway has Miljøfyrtårn certificate.
